The game is incredibly replayable, enjoyable, & to an extent; educational. However, it is very difficult to learn and master the game & there is any awful dlc paywall with many core mechanics locked behind such paywalls. But overall, it is an enjoyable game which I strongly recomend.. Despite all the problems with the DLC costs, if you are willing to pay the massive price for the better DLCs, this is an amazing game. To show you that, here is a story.

>Be me

>Bored

>Always play in Europe, so decide to play in the Middle East as Hormunz.

>Build large light ship navy

>Be the pirates of the persian gulf and india

>Expand rapidly, taking over oman, yas, parts of the eastern arabian coast on the persian gulf, and fought a war with that blue country east of yemen.

>Fight an indian country and timurids. Win through blockading the timurids and trapping the indian country's army in my capital and then killing them, blockading so they couldnt retreat.

>annex part of modern day pakistan to add to my empire

>all is good

>After truce ends, get overwhelmed by 3 different defensive wars. Mushash, Baluchistan, Sistan, the Timurids, and another indian kingdom attack me.

>Hold out for as long as I can, eventually overrun to my island.

>Secure strait with Superior Hormunzi navy

>Navy gets blown up

>on January 10th, Hormunz falls.

>War exausghahaughstion causes my country to explode into revolts.

>Rebels and other nations fight for what land they can get.

>Lose or give up all land but my great island, hormunz.

>The sun rises on Hormunz

>Is it time to do it all again?

RIP hormunz empire oof. Great game! 10V10 would buy again.. The game itself is good. There's nothing like it on the market. But as time went on and Paradox started to get greedy and have steeply increased the price of their DLC. Not only that, they have put almost all features behind DLC paywall. Even this is fine but the content vs price is very very poor.

The first few DLC were in the right range in terms of price vs content. Im not sure when this happened but it seems like Paradox has increased the price of its old DLC's. They were much cheaper than they are now. They were cheap enough to be able to buy it when its released as opposed waiting for a sale. Fast forward today. Paradox is asking for half the price of the game for content that does not even match the asking price. Its here then that lies a problem. Paradox is doing exactly what EA does with its sports series of games (which is, updated the player roster, add a few gimmicky stuff, then charge full price for the game). Basically milk the whales for all their worth. There are PLENTY of people\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665off about their DLC pricing policy. You can just go and read up on it in the respective steam reviews. Almost every complaint is about asking price vs content and how its blatant rip off. Its funny how when a big AAA company practises this kind of practises, the community is out there for blood. But yet here is Paradox doing the EXACT same thing and people defend them. Hypocrisy at its best.

All in all, this is a good game if you bought the base game and DLC BEFORE the price hike. Its highly not recommended now. The game has too many features that are locked behind paywalls. To be clear, the mechanic itself is available via the update. But to use the feature, you gotta pay. This insidious practise is a (very subtle) psychological warfare on the consumers will. Good luck fighting that. Knowing all this, if you do choose to buy the game, then i recommend that you install the update that is

compatible with you DLC and leave it there.. The best strategical game i've ever played.And the historical events are completely true like in real.

Neal in front of the Ottomans.. I dont know what I'm doing but I like it. Kinda surprised I have not done this yet..This game is quite hard to get into.To put this into perspective I still consider myself a intermediate player at nearly 1,000 hours (at the time of post).And not to mention, to experience the entire game you need to have all the DLC.Do not get me wrong you can still enjoy the base game; however, you cant do quite a bit of things.If you can get past all of that like I did.You can find a gem.. If you like the look of this game, all you have to do is look at the insane hours everyone reviewing this game has.

It's good.. Excelent game

---

The amount of DLC can be a little discouraging sometimes, as some of them seem very necessary, some features added should just have been in the base game imho, however with that being said I absolutely love this game and would recommend it to anyone interested in history.. Very expensive, if you want to play the game with all the DLC. But I usually use a 1 for 1 hour of gametime rule to see if I get my money's worth, and I have gotten that over and over with this game. Hands down my favourite game ever.. BEST GRAND STRATEGY GAME EVER. 9/10. BETTER THAN HOI. Wasted 200 bucks for dlc and 1000 hours of my life.. I guess it's alright. I can't deal with Paradox anymore. Have you seen the DLC's for this EU IV??! I had no idea they had released so many DLC's since I last checked into this game.

Now it feels like I'm missing out on huge amounts of content as paradox has released like 20 DLC's since I last looked into EUIV. I literally can't afford to play the entire EUIV.

I've had enough paradox. Your greed has finally pushed me over the edge. I'm not touching anything else you make.. 10/10 would convert Europe to islam again. A great Grand Strategy game with a lot of realistic events and so much to do. It is not a surprise that Paradox made this game. The game has so many mechanics which you will encounter sometime in your playthrough that further enhances the game. The game is not an easy game like some mobile strategy games, in fact, the game makes you think before every move you make. You can do anything you want from forming Italy to controlling the spice trade to a world conquest. It is exactly a game that you must have in your Steam library if you are a strategy enthusiast
